#### **DETAILED ACTION**

### Response to Amendment

This action is in response to the amendment submitted on July 11, 2002. Due to Applicants' amendments, the previous rejection under 35 USC 112, 2<sup>nd</sup> paragraph of claims 1-6 is withdrawn. Acknowledgement of the Declaration is *not* made because it has not been signed.

# Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office Action.

Claims 1-2 and 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oka et al., U.S. Pat. No. 6,064,524 as previously stated in the Office Action submitted on April 11, 2002.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Oka et al., U.S. Pat. No. 6,064,524 in further in view of Stein et al., U.S. Pat. No. 6,322,860 B1 as previously stated in the Office Action submitted on April 11, 2002.

As to the new limitation that the polyvinyl alcohol-based gas barrier layer is an intermediate layer between the hard coat layer and the cured epoxy resin base layer, Oka discloses the claimed invention except for the cured epoxy layer as a base layer and the polyvinyl alcohol-based layer as an intermediate layer. It would have been obvious to one having ordinary skill in the art at the time the invention was made to arrange the layers in the same order as in the instant invention since it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70.

# Response to Arguments

Application/Control Number: 09/769,376

Art Unit: 1774

Applicants' argument filed July 11, 2002 have been fully considered but they are not persuasive.

On pages 4-7, Applicants argue that Oka does not show the particular surface roughness and thicknesses. Examiner is not persuaded. Such values are properties which can be easily determined by one of ordinary skill in the art, and absent a showing of unexpected results, it is obvious to modify the conditions of a composition because they are merely the result of routine experimentation. The experimental modification of prior art in order to optimize operation conditions (e.g. thicknesses and surface roughness) fails to render claims patentable in the absence of unexpected results. All of the aforementioned limitations are result effective as they control the amount of roughness, smoothness, light diffusion, and thickness of the optical material. As such, they are optimizable. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the optical material with the limitations of the thicknesses and surface roughness since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980). Further, the Declaration submitted by Applicants can not be considered because it has not been signed.

#### Conclusion

Applicant's AMENDMENT necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 1774

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimberly T. Nguyen whose telephone number is (703) 308-8176. The examiner can normally be reached on Monday to Friday, except on every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cynthia H. Kelly can be reached on (703) 308-0449. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
